1. New Features in Real-Time SPC 7.10.4

Specification Display within the Data Collection Window

Provides a visual indicator of the specification limits in the data collection window. During the data collection process, a green bar in the collection window indicates the specification range, and a point represents the entered value. If the entered data value is not within the specification range, the point turns red.

2. Problems Resolved in Real-Time SPC 7.10.4

The following issues are resolved in Real-Time SPC 7.10.4:

- Instructions side panel is too small to be usable during data collection. (TT187753)
- AC/CA not applied to all defect types of the same severity. (286494)
