Real-Time SPC™ 7.10.3

Table of Contents

1. New Features in Real-Time SPC 7.10.3

- Addition of Data View to the Station Dashboard
    - The Data View is a spreadsheet view of data for each measure, organized by station, product, and process.
    - Key columns are sortable in ascending or descending order.
    - From each row of data, the user can edit information for individual observations or the entire subgroup.

- Option to Hide Control Charts on the Station Dashboard
    - Engineers can hide control charts on the station dashboard by measure.
    - With each control chart, the engineer can show all charts, only the first chart, or no chart.

2. Maintenance Items Completed in Real-Time SPC 7.10.3

3. Known Problems and Workarounds in Real-Time SPC 7.10.3

4. Problems Resolved in Real-Time SPC 7.10.3

The following issues are resolved in Real-Time SPC 7.10.3

- Data collection ability was removed when descriptor sampling plan order was set with only grouped defects/defectives present. (7.10.2 Hotfix) (TT187731)
- Control limits were inconsistent on the same charts of the PQS and the station dashboard. (TT187733)
